Sparsholt Memorial Hall

The Summer feels very quiet without the school but the usual activities have continued. As well as the usual activities there has also been the continuation of the age old problems, piano, car parking etc. We have though been in contact with Carbon Smart with the intention of establishing if we have any ways of generating electricity locally, for use by the community and our assets, Hall etc. They would provide a grant from the Rural Community Energy Fund and the first step would be a feasibility study. I will keep you informed and as yet have not met with any objections.

Sparsholt School

This year has started out very positively having left last year with some amazing SATS results, where Sparsholt performed significantly higher than the national average. The beginning of the year will mean more parents dropping off, therefore more cars. But this will calm down as the term goes on. There is also an increase in after-school clubs which will mean more staggered pick up times for children with less congestion at 3.30.

The school had some minor refurbishments towards the end of last year which has been great to come back to at the beginning of term.

Preliminary dates for the Christmas performances are Monday 12th and Weds 14th of Dec at 6.30pm
